

Regulations for event organizers regarding COVID-19 in Estonia.

General:

- No more than 100 participants (including the marshalls and support personel)
- The 2+2 rules must be followed
- No spectators allowed

If needed the event can be divided into two parts with 100 participants for both parts but in this case there needs to be a 60 minute period in between the races when the whole territory (paddock, track, pitlane, buildings) of the event are empty.

The larger the number of support personel for riders is, the fewer riders can participate in the event so to maximize the number of participants, the supportive personel (mechanics and other) number should be kept minimum.

1. Registration and health check of a participant (presumes that the participant does not have any signs of illness):

- a) Participant has to have a filled health declaration.
- b) One medic has to be in the registration committee who accepts health declarations (COVID-19) and valuates health of the participant.
- c) Recommended prerace COVID-19 test at least in the first event, for participants of age 10 and up.
- d) If between events or before the first event a participant has contact with a person with symptoms of COVID-19, it is mandatory that the participant stays in a 2-week quarantine and a test is done afterwards.

2. Paddock area:

- a) The teams have to be placed following the 2 meter rule in mind.
- b) Pit area for one participant (1 racer + 1 mechanic + 1 support).
- c) Teams with two or more racers need to guarantee at least 2 meter gap between race bikes. Number of support team allowed to paddock per racer – see point 2.b.

3. Training:

- a) When entering the pitlane and track racers keep 2 meter destance from each other.
- b) Pitlane has to be divided into zones and the teams need to use their smartphones etc to see laptimes. Gatherings infront of large screens need to be avoided.
- c) On the pitlane racer can only stop in the zone which is given to his/her mechanic/trainer.
- d) After training a session the racer returns to his/her pit area and leaves it only in extreme need.

e) The use of public areas including bathrooms and toilets on the race track, general public guidelines need to be followed.

4. Start and race:

a) Racers come to the starting lap straight from their pit areas. It is advised to choose the starting time so that the pitlane is open to avoid gathering and waiting.

b) If the racers need to wait for the pitlane to open for the starting lap, 2 meter distance from each other must be held.

c) After the race racers return to their pit areas.

d) Bikes taken in for technical inspection will be checked after the race and in the presence of the rider. The technical scrutineering teams use personal protection (gloves, masks)

e) The riders briefing takes place electronically or according to the general regulation of the race if it is possible to guarantee the safety of the participants and so that the information is heard by everyone (people keep 2 meter distance from each other and a loudspeaker is used). If the registration ends at 10.00, the electronic briefing will be sent by e-mail at 10.00 or will be uploaded to a website stated in the general regulation of the race.

5. Prize giving:

a) The results will be made public by a commentator or the timing system.

b) Maximum number of people per racer in the prize giving ceremony is 3 (rider/s + 1 support)

c) The prizes will be put on the podium and no handshaking takes place.

6. Marshalls:

a) Marshalls in the pitlane and starting grid use masks during the starting procedure.

b) Flag marshalls use masks, protection glasses if needed.

7. Medical personnel:

a) Use regular personal safety equipment. The organizer must provide a separate room or a tent for patients who have not been in a racing situation (participants who have not been involved in a racing incident but need medical help due to other health situation – sudden illness etc), to avoid check-ups in the ambulance that is on stand-by from racing incidents on the track.

b) The ambulance/medical tent that provides first aid uses protective clothing, respirators and protection glasses (in case the first aid lasts longer than 10 minutes) or as stated by the official guidelines of the health service provider.

8. Catering:

- a) Food is provided directly to the clients and if it is not possible to provide a eating area which follows the 2+2 rule, eating will take place in the pit areas.
- b) The catering must guarantee their employees health checks regarding COVID-19 and the use of personal protection and hygiene as needed.

9. Commerce:

- a) Service providers and other sales points (tire changing etc) must follow the regulations for shops, shopping centres and food service institutions regarding COVID-19.

The event organizer provides availability of hand sanitizers in the paddock area, pitlane and public spaces of the events territory (first priority administration, catering area and toilets).

It is the event organizers responsibility that the regulation are followed.
